

Epicor[®] Prophet 21[™]

A Fit-For-Purpose, Cloud-Ready Business System for Digital Distributors

EPICOR

We're here to help you grow your sales, profits, and productivity and distance yourself from your competition.

No other ERP provider knows distribution like we do. Epicor is focused on the things that matter to you—work queues, PO variance queues, kitting, assembly and production orders, advanced inventory forecasting, VMI, and special project pricing. We build our software using industry best practices and over 45 years of distribution experience. The Epicor Prophet 21 software system is designed specifically for distributors and is deployed at your discretion—in the cloud or on premises.

For these reasons and more, we know we can help you drive growth.

Epicor makes growth easier by making it simpler for distributors to:

1. Add product lines and services, expand market reach, accelerate sales cycles, lower customer-support costs, and anticipate customer needs.

2. Drive efficiency and productivity with software that's built around distributors' needs and deployed the way you want.

3. Improve employee skills and productivity, stay ahead of generational shifts, and give people the tools to grow in and enjoy their jobs.

4. Customize your services and pricing, deliver specialized assembly and kitting, reduce repetitive reorder costs, and use eCommerce and CRM to engage customers—all while fending off large, low-price competitors like Amazon and Grainger.

Distributors come to Epicor when they need a modern system to grow their business with the deep value and low risk of an experienced supplier. In fact, Epicor has five times as many second-time ERP buyers than the industry average.

Prophet 21 knows how you work—that's why it works better.

Prophet 21 is a fit-for-purpose, cloud-ready business system for digital distributors. It's the system of choice for growing distributors across a variety of industries, including:

- ▶ Fasteners
- ▶ Fluid power
- ▶ HVAC
- ▶ Industrial
- ▶ Janitorial/sanitation
- ▶ Medical supply
- ▶ Paper and packaging
- ▶ Petroleum
- ▶ Pharmaceuticals
- ▶ Tile and flooring
- ▶ Safety supply

When it comes to the core business functions you need to grow your distributorship, nothing comes close to—or goes as far as—the Epicor Prophet 21 software system:

- ▶ Customer Relationship Management
- ▶ Order Management
- ▶ eCommerce via Epicor Commerce Connect (ECC)
- ▶ Inventory Management
- ▶ Purchasing
- ▶ Wireless Warehouse Management System
- ▶ Financials
- ▶ Manufacturing
- ▶ Service and Maintenance
- ▶ Business Intelligence via Epicor Data Analytics (EDA)
- ▶ Enterprise Content Management

It's more than "pick, pack, and ship." Prophet 21 is an intuitive tool that will help you empower employees, save valuable time, and boost your bottom line while growing your top line. The Prophet 21 software system helps you easily add product lines and services while extending your market reach and attracting more accounts. It gives you the ability to respond quickly to changing customer demands, which can keep those customers coming back.

Simply put, the Prophet 21 system helps you grow your business.

Prophet 21 offers unique capabilities to grow your business by reaching more customers, delivering more value to each customer and defending your accounts from the large, low-price competitors like Amazon and Grainger.

If you want to grow, you need to reach more customers.

The customers are out there. If you want to connect with them in today's rapidly changing marketplace, you need effective, easy-to-use eCommerce, cloud, and mobile tools. These are the kinds of tools the Epicor Prophet 21 system brings together—integrating them into your systems, gathering information from your eCommerce storefront and mobile employees, increasing visibility, and making sure everyone—from the web to the shipping dock—is working together.

Epicor gives you a choice in eCommerce, including cloud and mobile solutions—options that fit both your business needs and technology strategy to give your people the power to win global customers from global competitors.

From digital, do-it-yourself tools and deep distribution applications to modern open-platforms, Epicor helps you to deploy and grow as you need.

Connect with customers at every stage of the process.

Epicor Commerce Connect (ECC)—an open digital commerce platform with a wide variety of B2C and B2B tools to help you find, attract, and convert new customers into business accounts—ECC features an open system that allows for specialized add-on apps and services, so as your eCommerce network grows, you'll be able to capitalize on more opportunities

Cloud Solutions—access-from-anywhere tools offer real-time connectivity between branches, mobile employees, and partners with a new level of security, monitoring, and disaster prevention and enhanced operational efficiencies that are unavailable in legacy systems

Epicor Mobility—Apple or Android connectivity allows employees on the move to access the information they need to be productive—even when they're away from their desks

If you want to continue to grow, you need to deliver more value.

It might seem daunting to take on your massive, low-price counterparts, but you have something they don't—the ability to customize.

Where they're interested in uniform-volume product sales, you can provide a wide variety of services that meet specific client requirements and requests. This takes you beyond pick-pack-ship, differentiating you by letting you focus on your customers' business types.

Tailor your business to your customers' needs

- ▶ Don't just identify the specialized services your customers require, act on them
- ▶ Simplify the bidding process—no matter how complex the job
- ▶ Easily manage job quotes through the purchasing process and into the project phase
- ▶ Stage deliveries to differing locations
- ▶ Make things easier in the back office with staged billing and tracked change orders

Add value to your products with kitting, assembly, and manufacturing

- ▶ Efficiently manufacture, stock, track, and sell assemblies, kits, and other custom products
- ▶ Bundle items that are typically sold as a single order line, eliminating the need to re-enter SKUs over and over again
- ▶ Reduce order entry time and avoid manual entry errors
- ▶ Boost sales by setting up kits and upselling assemblies to customers with consistent group orders

- ▶ Take the guesswork out of determining how many items or kits you can assemble from current stock
- ▶ Capture labor and material costs along with the current status of work in progress

Expand your business with managed inventory services

- ▶ Provide inventory services, manage customer on-site inventory, and support inventory vending
- ▶ Connect to your suppliers, provide visibility into stock positions, and expedite order placement

Lower your customers' ownership costs with post-sale services

- ▶ Expand your revenue and increase your value to customers by offering staged deliveries, field service, maintenance/calibration
- ▶ Offer global shipping and LTL and TL freight, giving customers real-time shipping status to help keep their projects on track

Epicor Prophet 21—A closer look at what's in it for distributors

Reach More Customers

eCommerce, Cloud, and Mobility

- **eCommerce**—ECC extends your investment in Prophet 21 with a tightly aligned, distribution-specific feature set
- **eCommerce Open Platform Solution**—ECC provides a selection of specialized add-on apps and services from an infrastructure of eCommerce software and support providers
- **Mobile Sales**—provide your sales force with the latest information to maximize responsiveness
- **Mobile Portals**—securely deliver business information through mobile devices—either Android or Apple—that you can customize to each employee's needs, keep your personnel synchronized when on the move
- **Mobile Proof of Delivery**—connect your delivery resources to real-time information for accurate service
- **Flexible Deployment**—Available in the cloud or on premises

"Prophet 21 helps us perform consistently at the top of the benchmarks and does a very good job manipulating lots of data. Epicor and Prophet 21 helped us reach our full potential. Prophet 21 developers suggested product upgrades and revision whenever required."

Andrew Wright, Chief Operating Officer | Mercedes Medical

Deliver More Value

Tailor To Customer Needs

- **Long-Term Contract Pricing**—for loyal, volume buyers and OEMs
- **Staged Material Deliveries**—track project activities and ship where and when material is needed
- **Progress-Based Milestone Billing**—pre-agreed billing points with change order and cost tracking
- **Vendor Rebate Tracking**—track and report purchasing under vendor rebate programs

"Prophet 21 gave us more visibility, and the ability to be cross-organizational was key. It can be shaped in any direction your business wants to go in. Prophet 21 fixed our inventory allocation problems. Utilizing Prophet 21 helped us understand what the root causes of all of our issues were."

Andrew Podner, Chief Operating Officer | Birmingham Fastener, Inc.

Kitting, Assembly, and Manufacturing

- **Production Orders**—track orders through production processes while adding labor and material costs
- **Process Orders**—assemble and manage orders for out-of-house/third-party services
- **Kitting and Assembly**—dispatch orders for kitting or assembly

"The kitting and hose decoder features are very powerful. Having customers in the U.S. and Canada—and vendors all over the world—makes the multicurrency and container receipts functionalities very convenient for our business. Prophet 21 allows us easy access to production orders ready for build by many different sorts of features. Overall, our partnership with Epicor brings us the tools we need to compete globally."

Dean Gordon, President | DeeTag Ltd.

Managed Inventory Services

- **Consigned Inventory**—leverage your investments in facilities, people, and systems to manage customer inventory within your facility
- **Supplier-Managed Inventory**—reduce customer order/fulfillment costs, strengthen the relationship, and grow your "share of the wallet" into related business areas
- **Inventory Vending**—add even more location value and avoid re-order delays and paperwork costs

"The integrated supply management capability of Prophet 21 is great for VMI and MRO. Now, we have one solution for billing, data mining, and reporting—all customized for our customers."

Jim Ruetz, President & General Manager | All Fasteners

Post-Sale Services

- **Service and Maintenance**—track service contracts, preventative maintenance schedules, warranties, and more while monitoring service technicians' schedules and open service orders
- **Mobile Proof of Delivery**—capture signature, times, maps, account information, and delivery instructions for your delivery fleets

"Proof Of Delivery gives us data to email customer invoices—addressing potential questions ahead of time. It also gives us the ability to track delivery metrics—one of our largest expenses—in ways not previously possible. It is helpful to see where delivery costs are outweighing profit margins for particular customers or orders—for example, learning where a delivery could be added on to an existing run rather than requiring a separate trip."

Jimmy Sobeck, VP of Finance and Administration | New South Construction Supply

Secure Your Accounts

Customer Analytics

- **Customer Profitability Analyzer**—assign business costs to customers to discover account profitability
- **Customer Buying Trend Analysis**—know when a customer changes his purchase pattern so action can be taken
- **Strategic Pricing**—identify each customer's key products and build custom price lists that maximize profit and minimize risk
- **Fast Ad-Hoc Reports/XL Connect**—use real-time links from the Prophet 21 General Ledger into the familiar Microsoft Excel product

"Strategic Pricing provided the easiest ROI I've ever seen in my career. We tell other Prophet 21 customers, Strategic Pricing pays for the entire Prophet 21 system investment!"

Russ Frazee, COO | FCx Performance Inc.

Customer Relationship Management

- **Special Offers, Information Sharing, and Relationship Events**—stay in touch with your customers to keep their interest
- **Manage Loyalty/Retention Programs**—build your own loyalty program and monitor it within Prophet 21
- **Up-Sell Customers**—communicate your capabilities and keep advancing your value position
- **Track Customer Buying Habits**—know when customers change their buying behavior and why
- **Salesforce Automation**—track lead/sales progress by defining opportunities, setting sales stages, and employing rich analytics to measure pipelines
- **Account Calling Programs and Email Newsletters**—stay in touch, promote, educate, and monitor customer satisfaction

"The company uses Prophet 21 CRM to do everything from managing sales opportunities and viewing the sales pipeline, to making financial and investment decisions based on trends in the pipeline. We all work from one database now, whereas in the past, our customer service department used a separate database. Without realizing it, we were duplicating a lot of efforts. With one database, we are much more current and coordinated."

Dave Scaglione, Vice President of Sales and Marketing | Electro-Matic

grow business  not software®

If you want to sustain growth, you need to secure your accounts.

Nothing is more important than taking care of the customer, and Epicor Prophet 21 gives you a better picture of what your customers think, want, and need. You'll have insight into how their businesses work, and you'll know which customers work best with your business.

This makes them more productive and you more profitable.

The Epicor Prophet 21 system helps you maintain your most valuable customer relationships by keeping you connected and ensuring that you're able to anticipate—not merely meet—their needs.

Protect your customer connections with Epicor analytic tools

- ▶ Track customer behaviors and use that information to fine-tune your business processes
- ▶ Enhance your decision-making capabilities with built-in dashboards and easy-to-follow metrics
- ▶ Use customer purchase histories to develop optimal prices for each account and every product
- ▶ Assess the profitability of each account
- ▶ Examine overhead and other business costs to determine where profits really come from

Maintain relationships and minimize loss with Epicor CRM

- ▶ Build loyalty programs and discount plans that keep customers, rather than incurring the high cost of searching for new customers
- ▶ Stay on top of customer data, and stay connected with each account
- ▶ Improve service quality and monitor customer satisfaction, detecting concerns before they become problems
- ▶ Build lead-gen call lists, and effectively manage calling programs
- ▶ Track customer buying habits to know what they need and when they need it

Know what your customers need before they need it.

You're capable of almost anything

Epicor Prophet 21 Capabilities
